Journal of Automated Reasoning (2007) 38 © Springer 2007

Contents to Volume 38

Volume 38 Nos. 1–3 2007

Special Issue on

Automated Reasoning with Analytic Tableaux

Guest edited by Bernhard Beckert and Lawrence C. Paulson

BERNHARD BECKERT and LAWRENCE C. PAULSON / Preface 1–2

ROGER ANTONSEN and ARILD WAALER / Liberalized Variable Splitting 3–30

DOMENICO CANTONE and MARIANNA NICOLOSI-ASMUNDO / A Sound Framework for δ-Rule Variants in Free-Variable Semantic Tableaux 31–56

SWEN JACOBS and UWE WALDMANN / Comparing Instance Generation Methods for Automated Reasoning 57–78

REINHOLD LETZ and GERNOT STENZ / The Disconnection Tableau Calculus 79–126

MARTIN GIESE / Superposition-based Equality Handling for Analytic Tableaux 127–153

NEIL V. MURRAY and ERIK ROSENTHAL / Efficient Query Processing with Reduced Implicate Tries 155–172

DAVIDE BRESOLIN, ANGELO MONTANARI and GUIDO SCIAVICCO / An Optimal Decision Procedure for Right Propositional Neighborhood Logic 173–199

DOMINIQUE LARCHEY-WENDLING / Graph-based Decision for Gödel-Dummett Logics 201–225

CARSTEN LUTZ and MAJA MILIČIĆ / A Tableau Algorithm for Description Logics with Concrete Domains and General TBoxes 227–259

THOMAS RATHS, JENS OTTEN and CHRISTOPH KREITZ / The ILTP Problem Library for Intuitionistic Logic. Release v1.1 261–271

Volume 38 No. 4 2007

R. GAMBOA and J. COWLES / Theory Extension in ACL2(r) 273–301

MARC AIGUIER and DIANE BAHRAMI / Structures for Abstract Rewriting 303–351

JEREMY AVIGAD and KEVIN DONNELLY / A Decision Procedure for Linear "Big O" Equations 353–373
